

Roots can AI

PS 2

1. splitbill, eg. bring what thing

2. AI recommendation (recommend route, temperature, what place nice...)

3. splitbill

4. share photo

5. can paste link (from xhs / google ...)

6. map (route)

7. invite friend as group

8. do remark

9. paste photo, (been there, map will light up)

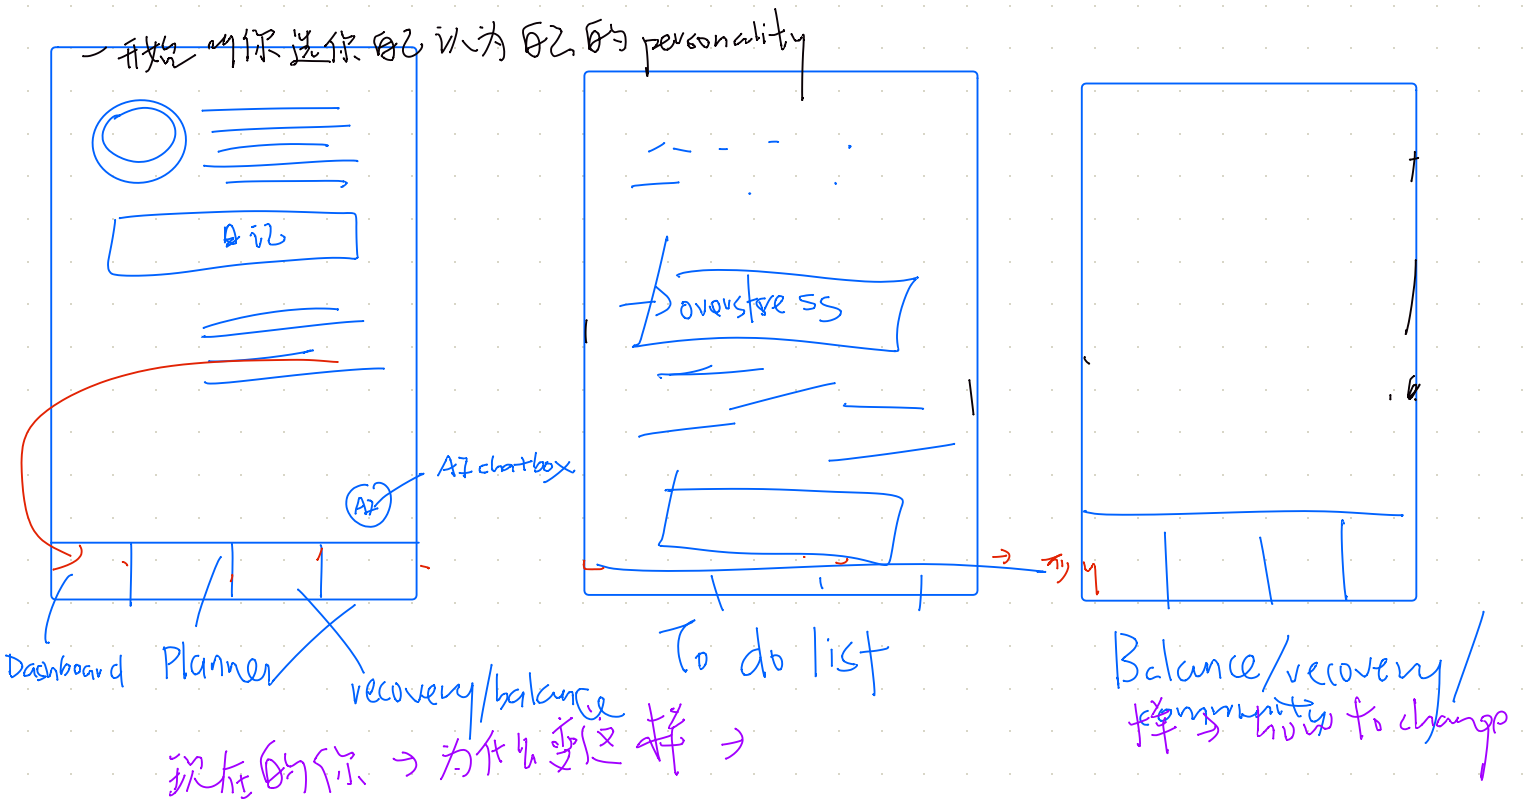

10. checklist

- restaurant, what good
play - unit place, reminder
stay - hostel
transport - route, review
buy - buy what souvenir ✓

1. journal → write / speak / paste photo → stress story review
2. workload visualizer → stress tracker → load balancer → recovery suggestion → 推迟 not importantly
 [dashboard] AI stress replay, pet, current u → future u
3. To do list AI weaving
4. Recovery action → mini game
 eg. overload? → go to walk for 10 min ...
 stress? → listen music
 future u
5. Community
6. AI chatbox

first enter → ask ur mood, mini game, reflect, how to solve

2. workload visualizer → stress tracker → load balancer → recovery suggestion → 推迟 not importantly
 stress replay, pet, current u → future u
3. To do list
4. Recovery action → mini game
 eg. overload? → go to walk for 10 min ...
 stress? → listen music
 future u
5. Community
6. AI chatbox

The remaining feature that we have is ...

What if I...

create scenario

ui how

how to calculate workload

tasks

1. dashboard

2. how can workload be calculated

↓

3. balance → u really overload

cave → feel really stress

↓
how to manage

recovery → pick one to rest

reflect → do revision / reflection

boundary → they don't know how to reject someone

有时间可以,
task 怎么影响 stress level

Good

1. physical [very detail]

2. ^{got} what if

3. overall is good

4. ui ~~is~~ good

Bad

1. ^{thing too much} ~~is~~ [pitching]

2. ~~is~~

3. priorities [homepage, what if, balance]

4. cave 不用, community not need too much

5.
