

Problem Statement: Beating the Burnout

Team name: roti canAI

Team member:

1. Christ Ting Shin Ling
2. Cornelia Lim Zhi Xuan
3. Chiam Jie Zu
4. Yong Sin Ying

App name: LoadLight

Prototype link: <https://loadlight-sable.vercel.app/>

Youtube Link: <https://youtu.be/wkfftuVOJb8>

#### User Guide Flow

1. **Open LoadLight**  
The user enters LoadLight and sees the welcome screen.
2. **Log in**  
The user selects **Log in**, enters the demo account, and enters the dashboard.
3. **Check Dashboard**  
The dashboard shows the user's current workload and what is taking the most space this week.
4. **Open Tasks**  
The user selects **Tasks** from the bottom navigation bar.
5. **Add Task**  
The user selects **Add task**, then enters the task title, category, start date, due date, estimated time, flexibility, priority, and reminder.
6. **View To-Do List**  
The user checks all open tasks and can mark tasks as not started, in progress, completed, or delete them.
7. **Edit / Reschedule Task**  
If the user wants to change a task, they select **Edit / Reschedule** and update the task details.
8. **Check Day Plan**  
The user opens **Day plan**, selects a date, and views all tasks active on that day.
9. **Check Weekly Plan**  
The user opens **Weekly plan**, selects a week, and sees the workload distribution across the week.
10. **Use What-if**  
Before accepting a new commitment, the user opens **What-if** to test how the new task affects workload.
11. **Use Balance**  
If the workload is too high, the user opens **Balance** to move, keep, or drop tasks.
12. **Use Lumi Care**  
The user can use Lumi for journaling, reflection, recovery actions, and boundary replies when stress becomes emotional.
13. **Review Progress**  
The user returns to the dashboard to see the updated workload after changes.

# 1.0 Welcome page

## Welcome Page

### Purpose

The Welcome Page introduces LoadLight and allows users to access the application by registering for a new account or logging into an existing account.

### How to use

1. Open LoadLight.
2. The Welcome Page is displayed.
3. Select **Sign up** if you are a new user.
4. Select **Login** if you already have an account.

## Register Page

**START LIGHT**

**Make room for your day.**

Create your LoadLight space, then Lumi will keep your entries on this device.

**Sign up** [New account](#)

Repeat password

Create account →

## Purpose

The Register page allows new users to create a LoadLight account.

## How to register

1. Select **Sign Up** from the Welcome Page.
2. Enter the required account information.
3. Create a password with **at least 6 characters**.
4. Select **Create account** to create your account.
5. After successful registration, the user can log in to LoadLight.

## Required information

- Name
- Email
- Password
- Confirm Password

## Login Page

## Purpose

The Login page allows existing users to access their LoadLight account.

## How to log in

1. Select **Login** from the Welcome Page.
2. Enter your registered email address and password.
3. Select **Enter Dashboard** to access the account.
4. After successful authentication, the user is directed to the Dashboard.

## Demo account

For demonstration purposes, use the following account:

- **Email:** mia@student.edu
- **Password:** demon123

## Homepage Dashboard

### Purpose:

The Dashboard provides an overview of the user's current workload and helps them understand what is contributing to their overall load.

The Dashboard provides:

- An overview of the user's current workload.
- A breakdown of the user's workload and weekly patterns.
- Lumi's insights based on the user's workload and reflections.

### Current Load

### Current Load

- **Current Load** — Shows the user's current load as a percentage of the week's total. Depending on the workload, the card indicates whether the load is still manageable, getting a little full, or too full.
- **Lumi status** — Reflects the user's current workload condition.
- **Plan Lighter** — Allows the user to review and manage the workload when the load is too high.

## What's Taking the Most Space Today

Displays the user's workload across five areas:

- **Mental**
- **Time**
- **Physical**
- **Social**
- **Errands**
- Each area displays a percentage representing its contribution to the user's current load.
- The user can identify which areas are contributing most to the overall workload.

## This Week

## A Few Little Moments

### Purpose :

- The **A Few Little Moments** section provides a quick recap of the user's mood throughout the week.

### How to use

- View the 7-day mood timeline to see Lumi's mood for each day of the week.
- Select **Replay my week** to open a detailed weekly reflection.
- The replay presents each day with:
  - The user's mood for the day.
  - A short reflection or note for the user.
  - A summary of what may have contributed to the user's mood or workload.
- Scroll through the replay to view each day's mood and explanation.

### Lumi Noticed Something

### Purpose:

- Displays an insight generated by Lumi based on the user's workload and reflections.

- The insight highlights possible patterns or factors contributing to periods of higher workload.
- Select **See what Lumi noticed** to view the full insight.

## Before you say yes..

## Purpose :

- Allows the user to check the possible impact of an additional commitment on the week's workload.
- Select **Try it first** to open the What-if feature.
- The user can review the predicted impact before adding a new commitment.

## Homepage Cards

### Purpose :

- The swipeable cards provide quick access to important information and frequently used features on the LoadLight app.

### How to use

- Swipe left or right to browse the available cards. The arrow buttons can also be selected to move between cards.
- **Current Load** — Displays the user's current load as a percentage of the week's total and indicates whether the load is Still manageable, Getting a little full, or Too full right now.
- **Journal** — Allows the user to record their mood and write a reflection about the day. Select **Record today** to create a journal entry.
- **This Week** — Displays the user's focus tasks for the week. The user can select the checkbox next to a task to mark it as completed, or select **Open tasks** to view and manage the full task list on the **Task** section.
- **Journal History** — Displays the number of saved journal entries. Select **View journal history** to review previous entries.

### Record a Journal Entry

### Purpose :

- The Journal feature allows the user to record their mood and write a reflection about the day.

### How to use :

1. Select **the Compose button** in the top right bar.
2. Select a mood:
  - **Calm**
  - **Okay**
  - **Tired**
  - **Stressed**
  - **Overwhelmed**
  - **Custom**
3. Select **Next** to continue.
4. Add the following information where applicable:
  - **Photo**
  - **Title**
  - **Tag**
  - **Journal note**
5. Alternatively, select **Speak** to enter the reflection using a voice note.
6. Select **Save** to save the journal entry.

## 2.0 Tasks

### To-do-list dashboard

### Purpose

The Tasks page allows users to add, view, edit, reschedule, and manage their tasks. Each task is used to calculate the user's workload, so the app can show whether the week is still manageable or becoming overloaded.

### What included?

- Total weekly workload
- Day Plan
- Weekly Plan
- List of work for that week

### When press +Add task

1. User need to enter the task title.
2. Choose the area affected, such as Academic, Work, Social, Personal & errands, Health & wellbeing, or Other.
3. Select the Start date for when the user plans to begin the task.
4. Select the Due date for when the task must be completed.
5. Choose or type the estimated time needed.
6. Select whether the task is Flexible or Fixed.
7. Choose a reminder time, such as no reminder, 5 minutes before, 10 minutes before, or 30 minutes before.
8. Select Add to save the task.

Edit

How this connects

Every open task adds to your active

Talk

1. When user select the Day plan tab.
2. Choose a date.
3. The app shows all tasks active on that selected day.
4. If a task lasts for multiple days, it appears on every day between its start date and due date.

## Weekly plan

1. When select the **Weekly plan** tab.
2. You can choose the week to view.
3. The app shows the workload for that week and the task distribution across each day.
4. Users can select a day inside the weekly plan to see what tasks are active on that day.

## How to manage a task

1. Open the Task tab to view all open tasks.
2. Tap Edit button to change the task details.
3. Update the title, category, start date, due date, estimated time, priority, flexibility, or reminder.
4. Select Save to apply the changes.
5. Select Complete when the task is finished.
6. Select Delete only if the task should be removed.

## 3.0 AI Chatbox

### Lumi AI Chatbox

### Purpose

- The AI Chatbox allows the user to interact with Lumi, the LoadLight AI assistant, for support and guidance related to the user's workload and wellbeing.
- The user can talk with Lumi about their current feelings, workload, or difficulties.
- Lumi provides supportive responses and suggestions based on the user's selected concern or message.

### How to use

1. Click the **Talk button** at the bottom-left of the LoadLight app to open the chat.
2. Select a suggested concern, such as
  - **I feel overwhelmed**
  - **I need a quick reset**
  - **I don't know where to start**

- I cannot focus
  - I said yes too much
  - I feel guilty for resting
3. Lumi provides a supportive response based on the **selected concern**.
  4. The user can continue the conversation by selecting another **suggested concern** or **entering a message**.

## AI Chatbox Response

*Example of Lumi's response after the user selects a suggested concern.*

## User chat with Lumi AI Chatbox

*Example of Lumi's response to a personal message from the user.*

## 4.0 What-If

Two ways to enter What-if:

- In the bottom navigation bar, tap “What-if”. The What-if dashboard opens.
- In the Home section, scroll down to “Before you say yes...” and tap “Try it first →”. This automatically opens What-if.

Purpose:

It is a space for checking a commitment before deciding whether to take it on.

It provides a snapshot of:

- user’s current load
- a list of saved What-if results (0 when no scenario saved)
- a set of example scenarios for user to try

## “ + Try my own change” button

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 1 of 8

1 Name the change  
**What might I say yes to?**  
Give this possible commitment a name and choose when it will happen.  
Scenario name  
  
Start date  End date   
Cancel Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 2 of 8

2 Answer one question  
Pick the closest answer. You can go back if it feels off.  
1-2h small set 3-5h half day 6h+ big back  
Back Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 3 of 8

3 Answer one question  
Pick the closest answer. You can go back if it feels off.  
Calm no rush Soon some pressure Urgent high pressure  
Back Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 4 of 8

4 Answer one question  
Pick the closest answer. You can go back if it feels off.  
Just me solo work Small group few people Many people more coordination  
Back Next

**Can I take this?**

Answer one thing at a time. Lumi will estimate the load.

Step 5 of 8

5 Answer one question  
Pick the closest answer. You can go back if it feels off.  
No mostly dead Some light effort A lot tiring  
Back Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 6 of 8

6 Answer one question  
Pick the closest answer. You can go back if it feels off.  
None clean Some a few tasks A lot many loose ends  
Back Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 7 of 8

7 Answer one question  
Pick the closest answer. You can go back if it feels off.  
Fixed hard to move Maybe some room Flexible easy to move  
Back Next

**Can I take this?**

Let's test it first.  
Answer one thing at a time. Lumi will estimate the load.

Step 8 of 8

8 Get my answer  
**Here's Lumi's estimate.**  
If this still feels realistic, show the full impact before deciding.  
Affected date range  
Starts: Thu 7 Sept  
Ends: Thu 17 Sept  
Now 83% → If I add it 89%   
Lumi's estimate  
Mental +4% Time +6% Physical 0% Social 0% Errands 0%  
Back Show me the impact

Where to enter:

Select the “ + Try my own change” button from the What-if dashboard. This opens the guided scenario form where the user answers one question at a time.

Purpose:

Create a personal What-if scenario and assess a commitment of your own.

How to do:

- Choose the best option at each step and click “Next” until the user reaches Step 8.
- Select “Back” at any time to change an earlier answer, or “Cancel” on Step 1 to return to the What-if dashboard.

## “Show me the impact” button

Where to enter:

Select the “Show me the impact” button from the previous screen.

Purpose:

- It helps user to quickly see whether the new commitment makes user load feel manageable or risky. It also gives a simple next-step recommendation based on the projected load.
- The “Before and after” section shows detailed comparison of the user's current and estimated future load across each area.
- The “Lumi suggests” section recommends a short list of practical suggestions.

Scroll to the bottom:

- Select “Accept and save” button will save the scenario in the “Saved answers” section on the What-if dashboard.
- Select “Reject or adjust” button will return to the guided scenario check (previous screen) and change answers before reviewing the impact again.

| “Accept and save” button                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Searching for Saved answers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## “Start from blank” area

In the dashboard, the “Start from blank” area performs the same action and produces the same result as the “ + Try my own change” button.

## “Quick tries” section

Where to enter:

Click any one example scenario from the What-if dashboard.

Purpose:

A set of example scenarios users can open immediately. They provide a fast way to explore common situations without entering every detail first.

How to do:

- Select an example to open and view its scenario result. Opening a Quick try does not save it automatically.
- Select “Accept and save” button will save the scenario in the “Saved answers” section on the What-if dashboard.
- Select “Reject or adjust” button will return to the guided scenario check and change answers before reviewing the impact again.

## 5.0 Balance

Where to enter:

In the bottom navigation bar, tap “Balance”. The Balance dashboard opens.

Purpose:

- It shows the effect of a new commitment, then lets users consider whether existing tasks should be moved, kept, or dropped from the week.
- *Care*, *Community*, and *Mini game* sections offer other ways to respond when workload pressure is not only a scheduling problem.

It provides a snapshot of:

- The first balance workflow “NEW THING ADDED” identifies the new commitment that is adding pressure to the day.
- The second balance workflow “Thursday becomes too full” makes the effect of the new commitment easy to see.
- The third balance workflow “Decide task by task” is the main planning area. It helps users choose which suggested changes feel realistic.
- “AI auto plan” button is a starting point if users are unsure how to rebalance the day.
- “Save my choice” button confirms the user's Balance choices (it is currently visible and enabled, but it does not yet save, apply, or confirm the selected choices).

## “AI auto plan” button

Before applying “AI auto plan”:

Applying “AI auto plan” (click “Confirm plan” button):

After applying “AI auto plan”:

Where to enter:

Select the “AI auto plan” button from the Balance dashboard. This opens Lumi’s suggested set of task decisions.

Purpose:

It shows a proposed combination of Move, Keep, and Drop choices for the available suggestions.

How to do:

- Select AI auto plan.
- Review the suggested choices.
- Select the “Confirm plan” button to use the suggested decisions.
- Select the “Adjust” button to close the suggestion and return to the task choices.
- Select the “Cancel” button to close the suggestion without changing current choices.

## Care dashboard

Where to enter:

From the Balance dashboard, select the "Care" tab located at the top of the dashboard.

Purpose:

- Three stages: Recovery -> Reflect -> Boundary
- It helps recovering users from pressure, understand what users are experiencing, and set boundaries when users need to say no.

## Care dashboard

### How to do:

- At the Boundary stage, users can describe the challenges or difficulties they are currently facing with Lumi.
- Then click the “Generate Reply” button to generate a response.
- Users can then customize Lumi’s reply by selecting the Soft, Firm, or Short version.
- It is a more respectful way to decline or respond to a new commitment.

## Community dashboard

Reply to a post by clicking the “Reply” and “Send” buttons.

React to a post by clicking the “Send care” button.

Create a post by clicking the “Post” button.

View posts

The post popped up!

Where to enter:

From the Balance dashboard, select the “Community” tab located at the top of the dashboard.

Purpose: It connects users with others by sharing experiences, ideas, and support.

## Mini game dashboard

Where to enter:

From the Balance dashboard, select the “Mini game” tab located at the top of the dashboard.

Purpose:

Take a short break and relax through a fun, low-pressure activity.

## 6.0 Me

Where to enter:

In the bottom navigation bar, tap “Me”. The Me dashboard opens.

Purpose:

It is a personal profile and settings space. It lets users view and update their profile details, review account information, and log out of LoadLight when needed.
